MEMORANDUM

SUBJECT: Phase II Installation Restoration Program Report,
McGregor NWIRP

FROM: Hilton Frey, Chief
Superfund Compliance Section (6H-EC)

TO: Guanita Reiter
Acting Chief
Oversight Section (6H-HO)

MC GREGOR NAVAL WEAPONS
TX 9170024708

Our review of the Phase II Installation Restoration Program report for the Naval Weapons Industrial Reserve Plant near McGregor, Texas, has revealed potential RCRA concerns at the Area G Pesticide site. Soil sample results are attached, as is an outline of the closure alternative selected by the Navy. As noted in the attached letter of August 6, 1985, this alternative has been approved by the Texas Water Commission. Please note the comments in our letter of October 7, 1985, to the Navy regarding inadequate ground water monitoring and post-closure monitoring. The Navy's response to these comments has also been included. If you have additional questions regarding the report, please contact Greg McCabe at 7-9705. Should you decide RCRA enforcement action is warranted at this site, please keep us informed of any progress.
